Shell, Painted w/Windows	\$89,874.00
Custom Configuration, Built to Suit.....	Quote

Revcon's Four Wheel Drive, All-Terrain TrailBlazer is a radical departure from traditional motorcoach design; frankly, it is unique. Designed as an off-road, All Terrain Motorcoach, the Revcon engineers can transform any unit by custom building whatever the mind can imagine (*within reason, of course*). Smooth and fuel efficient on the highway, the TrailBlazer retains its poise off-road as well. Streams, gravel roads, mountain trails, sand dunes and beaches – all are home to this 4x4. Jigs are used to ensure consistency and guarantee close tolerance of its aircraft-styled aluminum ribs (which are specially fabricated by an aircraft manufacturer). Wood *is not* used in the walls, roof, floor or structural supports; this allows the TrailBlazer to glide over rough terrain that would tear apart a wood-framed “wobbly box”! On the move, you can switch from two-wheel to four-wheel drive; and, the unique tag-axle (sway-bar enhanced) makes the operation so smooth (even on rough terrain) that it almost takes the fun out of it! With leather interior and rugged durability, you can go where you want to go – and you can do it now!
